Bartercard - International Transaction Voucher

CUSTOMER:
International Bartercard cards will not work when swiped through overseas Eftpos machines. In order to ensure you are still able to use your Bartercard easily and effectively overseas we have produced this electronic voucher to take with you when you travel. If the Bartercard member you are trying to spend with does not have vouchers as many of the restaurants and bars will not, then this voucher will enable you to still use Bartercard to purchase. Please make sure to print some off and carry them with you in your car or wallet / handbag when travelling. Simply use these just as you would a normal voucher at home entering your name and number in the customer section and letting the merchant enter their details.

MERCHANT:
Please use this voucher for International Transactions. Please phone the Authorisation Numbers as per the below and post into your local Bartercard Office for processing as per a normal manual voucher.
